

TRAINING

PowerPrinters Webfed

Increase print quality and maximize performance

Structured training programs focused on your educational requirements, will position your crews to maximize the performance of your manroland press system.

manroland's PowerPrinters offers a comprehensive training program that focuses on developing press crews in the areas of the printing process and press operating techniques. With a variety of training components, each course can be created specific to your needs.

How it works

Our certification programs provide your staff with a structured education program. Each certification stage builds on the previous course, so you can be assured that your press operators learn the suitable skills for their level of knowledge.

Trainees are tested at the completion of various milestones to ensure the appropriate level of knowledge and skill is achieved. Our certification programs will allow your employees to develop quickly under our managed growth program.

Our PowerPrinters custom courses will develop your press crews in the areas of their day to day duties that have the greatest impact on productivity. Focusing on waste reduction, process improvement, and print process awareness, your press crews will be better positioned to support your press operators, resulting in improved process efficiency, increased productivity, and reduced waste.

PowerPrinters uses a combination of theoretical and practical instruction so your press crews completely understand the content and feel comfortable executing the new knowledge and skills into their daily duties. PowerPrinters also ensures the success of the knowledge transfer by incorporating theoretical and practical testing of the trainees. manroland's competency based assessment will ensure that your crews will apply the knowledge they have learned into their daily duties. ■■

Introductory Seminar

Introduction to the manroland press system. Trainees learn system components, functionality, and press operating procedures.

Certification Seminar

Structured content that develops the trainee over multiple sessions. Trainees build theoretical and practical knowledge resulting in increased process troubleshooting skills and maximized press performance.

Custom Seminar

Content is created specifically to your needs. Courses can be delivered in our state-of-the-art training center or at your facility.

Seminar Focus Areas

- Print process awareness
- Press materials
- Printing consumables
- Theoretical color theory
- Press operating parameters
- Dampening system
- Tension control
- Daily duties
- Press make-ready procedures
- Plate loading and handling
- Paper handling and preparation
- Press maintenance

Benefits

- Maximized press performance
- Reduced make-ready and production waste
- Increased process troubleshooting ability
- Increased employee retention
