Roller Exchange Program manroland R900/6

The manroland roller advantage

**Make sure your manroland press runs to precise specifications with the printcom®
–certified rubber-covered roller replacement program**

- For top quality and high performance, it's the industry's most advanced and affordable roller exchange program
- We take back your worn rollers and you get reconditioned rollers with all-new surfaces back in exchange
- All coverings used are custom engineered and certified by **printcom** to match your specific manroland press model exactly
- All rollers provide dimensional stability, low heat build up and resistance to most pressroom chemistry
- Researched and tested to install and set easily with minimum resetting required
- manroland-engineered cores covered with US manufactured products are selected for individual specification
- With this **printcom** program, you'll reduce large, in-house inventories with our 24 – 48 hour shipping policy
- With this **printcom** program, you'll significantly reduce downtime due to roller problems

And you get a 60-Day No-Hassle/No Invoice core return policy

- No charges for a “core-deposit” unless exchange cores have not been returned within 60 days of order shipment
- No core repair or replacement charges for any cores returned

manroland 900/6, 902/6, 904/6, 906/6, 908/6

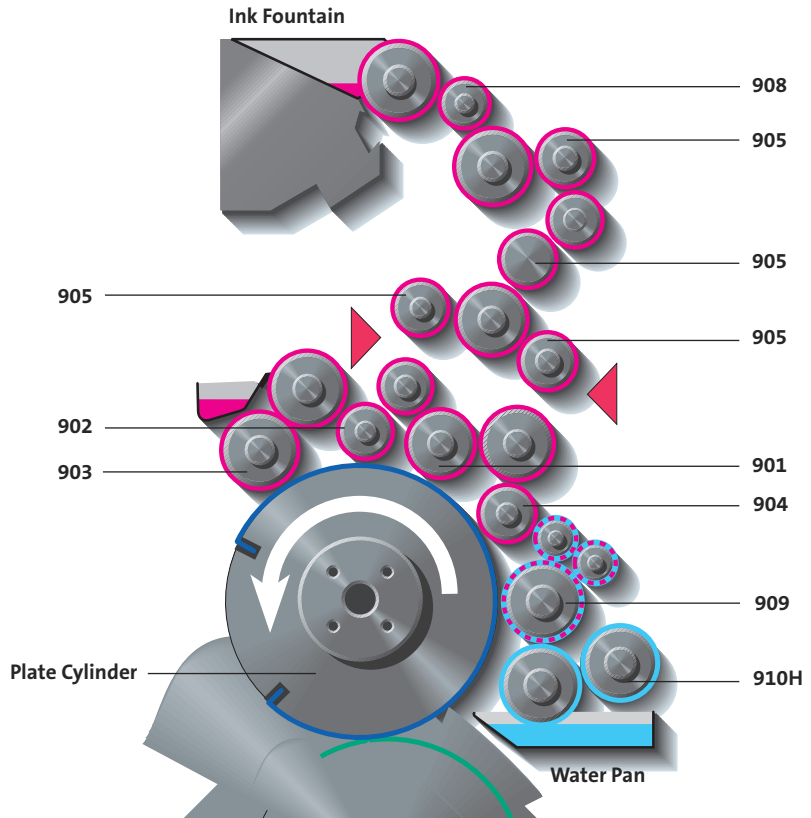

Duo-Flo™ Rubber Compound for Presses using both UV & conventional inks, hybrid and conventional inks, or only conventional inks.

R-900/6 is a 56.692 FL.
R-900/5 is a 51.968 FL.
R-900/4 is a 44.881 FL.

The 900/6 is what we carry in press ready.

You will not be charged the “core charge” unless exchange cores have not been returned within 60 days of order shipment.

Rollers do not include bearings

manroland R900/6
