

MAINTENANCE & SERVICE CONTRACTS

Oil Analysis

For trouble-free operation & optimal oil change intervals

Oil analysis to reduce wear of printing system components.

An oil analysis evaluates oil condition. The oil is checked for impurities and metallic deposits for early detection of abnormal wear and to take preventive measures.

The analysis can determine optimal oil changing cycles and prolong the intervals between maintenance work.

The oil analysis is carried out in the scope of the service contract as required. ■■

Advantages

- Early detection of wear and possible damages
- Cost savings through failure prevention and optimized oil changing intervals
- Greater production security
- Reduction of downtime

Price

Fixed price per press or printing system; travel and other costs included in the service contract

Remarks

The oil analysis can be done during or at the end of an audit, repair or inspection
