

MAINTENANCE

# Proserv Preventive Maintenance

## Protect your productivity. Preserve your profits.

**Added value for your pressroom starts by using the best concepts for your processes through custom-tailored service.**

Your manroland pressroom is the engine that drives your business. It helps you beat your deadlines. It energizes your customer relationships. It powers your profits. You can't afford for it to falter. That's why it's so important to protect your investment in technology with timely preventive maintenance.

### **Customized maintenance for your needs**

manroland makes it easy to choose the right program for your company. ProServ offers a choice of four preventive maintenance plans, each more intensive than the next. The result: you can select precisely the level of coverage you require, and budget it with an annual fixed-price payment.

### **Examining every area of the pressroom**

Every ProServ plan begins with a safety check, then a systematic check of each system throughout the press to ensure that your manroland presses are at their peak productivity, and capable of delivering the highest print quality, consistently and reliably. A press working at its maximum potential ensures that your clients are never disappointed and your profits never stop growing.

If none of the pre-selected preventive maintenance programs fit your press room needs ask your Print Value Consultant about ProServ Flex or inquire about a Thermographic Inspection to identify electrical troublespots. ■■

From analysis to repair, from training to machine improvements - manroland has defined a comprehensive program to guarantee trouble-free and optimal processes for your pressroom.

### Program Features

**ProServ Basic** is a factory-defined basic preventive maintenance program carried out by your pressroom team. It includes:

- Customized maintenance schedule and logbook
